Authorization for this examiner's amendment was given in a telephone interview with Kentaro Higuchi on March 31, 2008.

The application has been amended as follows:

- Claim 21 now recites:

A game apparatus for executing a game by controlling movements of characters constituting a character group in a game space and by generating an image of the game space, wherein the character group includes a plurality of character groups, the apparatus comprising:

- a point setting section for setting a plurality of sample points in the game space;
- an inertia calculation section for calculating positions of the characters after a prescribed time when the characters keep a present moving situation;
- an arrival time calculation section for calculating the time for each character to arrive at the set plurality of sample points from the calculated positions as starting points;
- an area recognition section for recognizing an area pertaining to power of each of the character groups, wherein the power of each of the character groups is based on an arrival time of each of the characters in the character group to each character's sample point, from among the calculated arrival time;
- a space area recognition section for recognizing, as a space area, an area not belonging to the power of any of the character groups in the game space, based on the recognized area pertaining to the power;
- a movement control section for controlling the movements of the characters based on a position of the space area and/or a magnitude of the space area in the game space; and
- a generated image display section for displaying the generated display image.

Allowable Subject Matter

2. Claims 1, 3-10, 12-19, and 21-23 are allowed.
3. The following is an examiner's statement of reasons for allowance:

In at least in each of independent claims 1, 3, 12-14, and 21-23, Applicants claim a game apparatus or a game method including determining space areas in a game space that do not belong to any of the character groups, wherein the space areas are then used to control the movements of the character groups. The prior art, alone or in combination, do not teach or suggest determining game spaces that do not belong to the character groups, nor does the prior art teach or suggest using the game spaces to control the movements of the characters.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
